ABOUT ASIAN CONCRETO

Located strategically in the western part of Nepal in Nawalparasi, Asian Concreto Pvt. Ltd. caters to a vast range of clients. An extensive range of superior grade concrete landscaping products, available in a multitude of colors, patterns and designs to suit all types of architectural projects – residential, commercial, industrial & institutional premises, are provided by Asian Concreto. The complete range covers products such as concrete interlocking Pavers, Kerbstones, Paving Slabs, Concrete Bricks and Engineered Hollow Blocks. Commissioned in 2018, it is already one of the leading suppliers of Nepal.

Asian Concreto's stylish and modern outdoor paving solutions create features which enhance a building's landscape. Further more, latest technologies and practices are incorporated to create products that are a cut above the rest.

The entire state-of-the-art plant, imported from Masa AG, Germany, is the most modern and the largest in Nepal. A completely computerized plant, with unique systems, produces products of high strength and fine finishes. The plant also has a completely automatic curing system and machinery to produce unique & top quality products.

Asian Concreto's, first commitment is to provide quality products through prompt delivery, followed by active involvement until project completion.

STRIKING

DURABLE

ENVIRONMENT FRIENDLY

OUR USP

Asian Concreto has become one of the most preferred names in the Nepal construction industry because of the clear-cut strengths that set it apart from other unorganized players in the market.

The best raw material: Our quality control procedure are truly top notch. Our aggregate crushing plant begins right at the core - by picking raw materials that ensures the raw materials are created properly, and they are tested as well to ensure the best standard of concrete mix for our product line.

The best European Technology: We have invested in state-of-the-art German Technologies and the advanced mechanisms ensure that we are the best when it comes to block making—with zero room for any kind of error!

The end result is that all our products are of the top notch quality—be it build, design or size!

**The Core
STRENGTH**

The Commitment that **Lasts**

At Asian Concreto, assured quality is our number one priority. The different measures we undertake ensure that each of our products match up to the quality standards we have set.

Our Quality Control Measures include:

- » Raw material checks on routine basis
- » Raw material samples analysis if in independent labs
- » Mandatory submission of test certificates for cement
- » Regular water analysis tests
- » Pigment quality measures using technical data and BIS Compliance
- » Close monitoring of the manufacturing process for texture, dimension, moisture, content etc.
- » Routine checks of machinery at plants
- » Curation of blocks using state-of-the-art automated curing chambers
- » Finished products checks in compliance with ISO and NS standards

**WORLD'S
BEST
GERMAN
PLANT**

Asian Concrete's state-of-the-art plant (entire plant) imported from Masa AG, Germany, is the most modern and the largest in Nepal. Masa, together with its subsidiaries, designs and manufactures plant and machinery for the building material industry. It offers the same for manufacturing concrete blocks, concrete slabs, autoclaved aerated concrete (AAC) blocks, reinforced AAC elements, sand lime bricks, and sand lime elements; kerbstone presses for manufacturing compacted concrete elements; and mixing and dosing plants. The company also offers machines and plants for the production of concrete stones, hollow blocks, paving stones, and kerbstones; and handling systems.

The concrete block making plants made by Masa are generally structured as follows:

The different materials required, go from the aggregate silos via transport systems to the dosing and mixing plant. It produces high-quality concrete which is designed to meet the individual customer demands and is adapted to the available raw materials. Depending on the product, recipe is set, the concrete is then conveyed to the block making machine. This then compacts the concrete in a mold using a combination of pressure and vibration. The fresh concrete products go to product pallets via a conveying system, then pass through an optional quality assurance system, into the curing chamber.

After the curing process, the products are combined to form a pack of blocks or bundles using a Cuboter and are transported to stock-yard by forklifts. The used production pallets are returned to the block making machine.

General Plant Layout

1. Dosing and mixing plant
2. Concrete transport (bucket conveyor)
3. Concrete block making machine
4. Framework with Powertainer and Hydraulic station
5. Wet side transport
6. Elevator
7. Finger car
8. Curing
9. Buffer finger car
10. Lowerator
11. Return transport
12. Centering device
13. Cross transport/Production pallet buffer
14. Cubing/ Cuboter
15. Cube conveyor

Advantages

- » Pavers produced in a Masa Plant factory ensures blocks with consistent quality and high dimensional accuracy.
- » Good quality of blocks ensure durability of pavements, when constructed to specifications.
- » Masa Plants have higher tolerance to deflections without structural failure.
- » Masa Plants do not require longer curing, and so can be transported shortly after production.
- » Masa Plants use highly sophisticated equipment with lesser human interference.
- » Fully Programmed Logic Controlled weigh batching, mixing and moulding of products on pallets.
- » Strapping of cubed material.
- » Attractive finish.
- » Maintenance of a Masa Plant is easy and simple.
- » Use of coloured blocks facilitates permanent traffic markings, and different areas can be demarcated by color code.

The image features a collage of various paving tiles. The top right corner contains the 'ASIAN CONCRETO' logo, which consists of a stylized 'CC' in black and orange, followed by the word 'ASIAN' in large black letters, 'CONCRETO' in orange letters, and the tagline 'BEAUTIFY YOUR WAY' in smaller black letters below a horizontal line. The background is a collage of different tile patterns and colors, including a purple planter with green and red foliage, a reddish-brown textured tile, and a light-colored wood-grain tile.

ASIAN ITALIA

Luxury Paving Tiles

ASIAN ITALIA Luxury Paving Tiles

Multifaceted. Spectacular. Artistic.

Asian Italia paving tiles are inspired by hand-chiselled paving stones originating in the Tuscany region of Italy. The slightly rough yet clean texture of the tiles gives your space an exotic appeal that is at once exclusive and cosy.

Asian Italia's ridge-like pattern, sober colour schemes and grounded texture hark back to medieval castles and elevate your space to the standard of true art.

Special Features:

- Made in state-of-the-art Automated Plant with technology from Germany
- Seamless fitting
- Great durability
- First-rate material
- Variety of colours

Where to be used:

Walkways | Garden Areas | Patios | Parks | Pool Decks

Colour Range:

Specifications:

ASIAN BRICKS

Machine Made Brick

ASIAN BRICKS

Machine Made Brick

Consistent. Durable. Eco-Friendly.

Asian Bricks are Concrete Bricks, the perfect choice to build a range of both load-bearing and non-load-bearing walls because of its great strength, durability and consistent dimensional accuracy.

Asian Bricks' long life cycle and energy efficiency lead to very little environmental impact, making it ideal for a cleaner, greener world.

Special Features:

- Manufactured in 100% Automated Plant with technology from Germany
- Superior finish
- Excellent sound and thermal insulation
- Lower density and weight
- Pre-cured
- Minimum breakage and wastage
- Reduces plastering and labour cost

Advantages:

- Enhanced Colours and Textures

Asian Bricks are manufactured with integral pigments that enhance colour retention, achieve natural colour tones, and add stunning depth and richness

- Dimensional Consistency

Asian Bricks are cured in a form that allows it to maintain a consistent, uniform size, and results in efficient installation

- Unmatched Durability

Asian Bricks are cost-effective products, crafted with a high strength mix. It can withstand everyday wear and tear, and minimize maintenance

Where to be used:

Fair Face Walls | Partitioning Walls | Load Bearing Walls | Boundary Walls | Decorative Application

Colour Range:

Grey

Red

Customized

Laying Pattern:

Specifications:

Parameters	Dimensions
Length (mm)	230
Height (mm)	55 / 70
Breadth (mm)	110
Bricks/m ³	718.65 / 564.65
Bricks/ft ³	20.35 / 15.99
Compressive Strength (N/mm ²)	≥45 / ≥ 50

ASIAN HOLLOW BLOCK

Concrete Blocks

ASIAN HOLLOW BLOCK

Stronger. Lighter. Better.

Asian Hollow Blocks are Concrete Blocks from the house of Asian Concrete with two or more hollow cavities that can be further reinforced making them the ideal material to build both load-bearing and non-load bearing wall structures.

Asian Hollow Blocks provides structures with augmented strength and stability, and has minimum environmental impact.

Special Features:

- Manufactured in 100% Automated Plant with technology from Germany
- Superior finish
- Excellent sound and thermal insulation
- Lower density and weight
- Pre-cured
- Minimum breakage and wastage

Where to be used:

Where to be used: Fair Face Walls | Partitioning Walls | Load Bearing Walls | Boundary Walls | Decorative Application

Colour Range:

Specifications:

Parameters	Dimensions
Hollow Block (in)	4 / 6 / 8
Length (mm)	390
Height (mm)	190
Thickness (mm)	100 / 150 / 200
Blocks/m ²	13.49
Compressive Strength (N/mm ²)	≥ 7.5
Blocks/sqft	1.25

8" Hollow Blocks

6" Hollow Blocks

4" Hollow Blocks

Advantages:

- **Rapid Execution of Work:** Asian Hollow Blocks are lighter and of uniform size. This facilitates rapid execution.
- **Increase in Floor Area:** Option to build thinner walls helps save space and increase floor area.
- **Reduces Construction Cost:** Asian Hollow Blocks helps save construction material and reduces construction cost.
- **Better Insulation:** Offers great insulation against sound, heat and dampness.
- **More Durable:** Asian Hollow Blocks withstands atmospheric turmoil and requires no protective covering.
- **Bonding of Mortar & Plaster:** Rough surface provides good bonding of mortar and plaster.
- **Cost-Effective:** The block's durability and great strength reduce maintenance cost.

ASIAN KERBSTONE

Half-Battered Kerb Stone

Half-Battered Kerb Stones are the most popular variety of kerb stones in the world. They are extremely cost-effective and specially designed to save vehicles from grazing themselves against the edge of a pavement or carriageway.

The kerb stones have a sloping back profile which provides this protection. Their inherent shape also allows road rollers to operate right against the edge of pavements without damaging the kerb surface.

ASIAN KERBSTONE

Bull-Nosed Kerb Stone

Bull-Nosed Kerb Stones provide a soft-edge restraint to the kerb stone while maintaining a 90° angle with the ground. Due to its smooth, curved edge, Bull-Nosed Kerb Stone is suitable for a variety of applications with the aim of providing definition.

Bull-Nosed Kerb Stone is apt for driveways in residential schemes and commercial applications where strength and durability are essential.

Special Features:

- High dimensional accuracy
- Extreme strength
- Flawless finish
- Low water absorption

Advantages:

- Remarkable longevity and value retention
- Fewer joints, aesthetically pleasing
- Reduced blackening
- Cost-effective
- Low maintenance

Where to be used:

Roadways | Pathways | Bordering Pathways | Bordering Steps |
Bordering Flowerbeds

Colour Range:

Specifications:

For both Half-Battered Kerb Stone & Bull-Nosed Kerb Stone

Parameters	Dimensions
Length (mm)	250/300/300
Breadth (mm)	200 / 200 / 165
Height (mm)	380 / 350 / 325

Asian Concreto Pvt. Ltd.

**Compared
to other paving
options, our
pavers are the
best because :**

Quality

We have top-notch quality pavers thanks to cutting-edge technologies, rigorous quality inspections, and performance testing by renowned labs.

Life Expectancy

Our pavers are durable enough to withstand most types of damage and have a 20-year lifespan.

Zero maintenance

Our pavers never fade, peel or rot, therefore you will never need to paint and hardly have to be cleaned.

Eco-friendly

Our pavers are totally environment friendly, it has no harmful effects on the environment.

Construction time

Our paver's construction time is medium as pavers are laid manually, after construction immediate use is possible.

Rainwater Drainage

Our pavers allow water to pass through to the base, reducing pooling or flooding in heavy rain, which is a great advantage of the pavers.

Safety

Our pavers are safe and have strong skid resistance, which helps save braking distance.

Reuse

Our pavers can remove and reinstate after repairs.

Color and Shapes

Our paver is available in distinct colors and shapes, making them immensely variable.
