COMPANY INTRODUCTION

Setting new standards with the introduction of NEPAL STANDARD (NS) for Pavers and Kerbstones by Nepal Bureau of Standards and Metrology; Asian Concreto is Nepal's first Company to manufacture Nepal Standard Certified Paver and Kerbstones and also is the Nepal's largest company in the concrete landscaping industry. Located strategically in the western part of Nepal in Nawalparasi, Asian Concreto produces an extensive range of superior grades concrete landscaping products such as concrete pavers, tiles, bricks, hollow blocks, and kerbstones. With the products being available in a large variety of colors, patterns, and designs to cater to a vast range of clients, the products are suitable for all kinds of architectural, residential, commercial, industrial & institutional projects. Asian Concreto's state-of-the-art German plant makes the entire process of production and quality control completely automated ensuring that the products are produced in high strength, quality, accuracy, and design. Incorporating the latest technology and business practices, Asian Concreto goes above and beyond the current market trend and competition by ensuring stylish, modern, and durable outdoor paving solutions. Asian Concreto is committed to providing quality products, prompt delivery, and active involvement in the projects till their entire completion. All of our concrete paving products are crafted to the highest quality to ensure years of enjoyment. This gives you the peace of mind to know that your Asian Concreto's product will last for years to come.

PRODUCT SPOTLIGHT

Asian Rectangular Paver

Asian Rectangular Paver is the simplest and one of the most widely used pavers available in the market. Such pavers have been in use since the time of ancient times in western countries. Over the year they have acquired the stature of a timeless classic and become popular due to their versatility and operational convenience. Asian Rectangular Paver can also be laid out in a variety of patterns for spectacular visual appeal and high degree of resistance to loads, wear, and mechanical damage. In addition to being economical, interlocking concrete pavers are also widely available in water-permeable designs, which have added ecological benefits. This is provided with different earthy color blends and contemporary color blends.

ASIAN RECTANGULAR PAVER USES

1. Asian Rectangular Pavers can be applied in several fascinating patterns to produce warm, luxurious textures. Combination of all the available colors and textures and you have the potential for effects limited only by your imagination.
2. Simple in design, Asian Rectangular Pavers are capable of meeting the demands of both architects and engineers for a beautiful, yet durable paving surface.
3. Asian Rectangular Paver does not need special maintenance as compared to concrete or asphalt surfaces. A simple water washing can help keep the blocks clean and bright.
4. Pavers are very durable, and if they are adequately interlocked, they can easily last for about 20 years. Paver blocks can withstand hefty vehicular load as well.
5. These pavers are very easy to install and do not need any special equipment for their installation. The most important advantage of paver blocks is that they can be easily replaced. If one of the blocks gets damaged, it can be easily removed and replaced with another one.
6. Asian Rectangular Paver when laid in certain patterns like 45 and 90-degree V - shape, offers the toughest and durable paving, interlocked very well, including for heavy traffic. Because of this, it is known to be the most reliable paver, more so because of its locking abilities.

PROJECT SPOTLIGHT

Community Road Project
Radhakrishna Tole, Ekantakuna Lalitpur, Nepal

Radha Krishna Tole Ward No. 13, LMC has selected Asian Concreto's Rectangular Blended Paver for the construction of the Community Road of 220 m² starting from Rhythm Neurosychiatry Hospital to ring road. Asian Concreto had provided technical support of the project allowing our Company to construct keeping in mind the utility, challenges and need factor of the daily users in the area. The Asian Rectangular paver is most preferred and used in the Lalitpur site, since the blended

texture provides a stylish and comforting look. Besides the aesthetic aspect, the purchasing committee members were looking for fast and safer way to upgrade their community road. Paving materials can be laid in any type of moderate weather condition, which helps to keep the cost of installation, time management and budgeting issues in check. The installation process is relatively simple, quick and easy, so they are ready to be traversed upon immediately after the installation process is finalized. Unlike to asphalt Asian pavers were the best solution to the problem.

Footpath Project
Putalisadak - Anamnagar Kathmandu, Nepal

Putalisadak - Anamnagar Road footpath is one of the main disabled-friendly road infrastructure projects conducted by Department of Road, Kathmandu after realizing the importance of disable friendly and Accessible footpath. In this project the Asian Rectangular paver was used as well to effectively guide the visually challenged safely through their walking experience.

Road officials has preferred our Asian Rectangular Blended pavers colorful and neat appearance to the street. Finally, Asian Kerbstones (Half-Separated Kerbstone) were used to separate the footpath from the road to offer safety to the pedestrians and motorists while providing the complete aesthetic experience of an international standard footpath.

TESTIMONIALS

“Dwarika Karki
Block Manufacturing Committee President

हामी 13 नवलाईको राधाकृष्ण टोले रोड प्रोजेक्टमा प्रयोग भएको एसियन कंक्रीटोको Rectangular Pavers हामीले खोजेको र रोनेको नर्स गृहकारको पाएका छौं। हामी बनेट र फ्लाइड अस्फाल्ट यो प्रोजेक्ट आसाइने नै राम्रो सँग सम्पन्न भएको छ। हामीलाई कालो पत्रेको र दुइगुणा छाज्नेको बेटक विकल्प खोज्ने क्रममा एसियन कंक्रीटोको उत्तमन पर्यो। अहिले हामी बाटोमा धुलो नउड्ने र परेको पानी पनि ground मा recharge हुने भएको ले हामी यो टोलेलाई अर्को थापा सहयोग पुर्याने भएको छ। पछि केही बाटो खन्ने काम गर्नु परेमा पनि reapply गर्नु सजिलो हुने छ। हामी locality लाई चाहिने स्वरको समानको प्रयोग भएको हामीलाई महत्सु भएको छ। सुन्दरताको हिसावले पनी यसले traditional look कायम गरेको छ। आशा छ यो बाटो एसियनको team ले दावी गर्नु भएको नदनेने वर्षौ वर्ष टिक्ने छ।

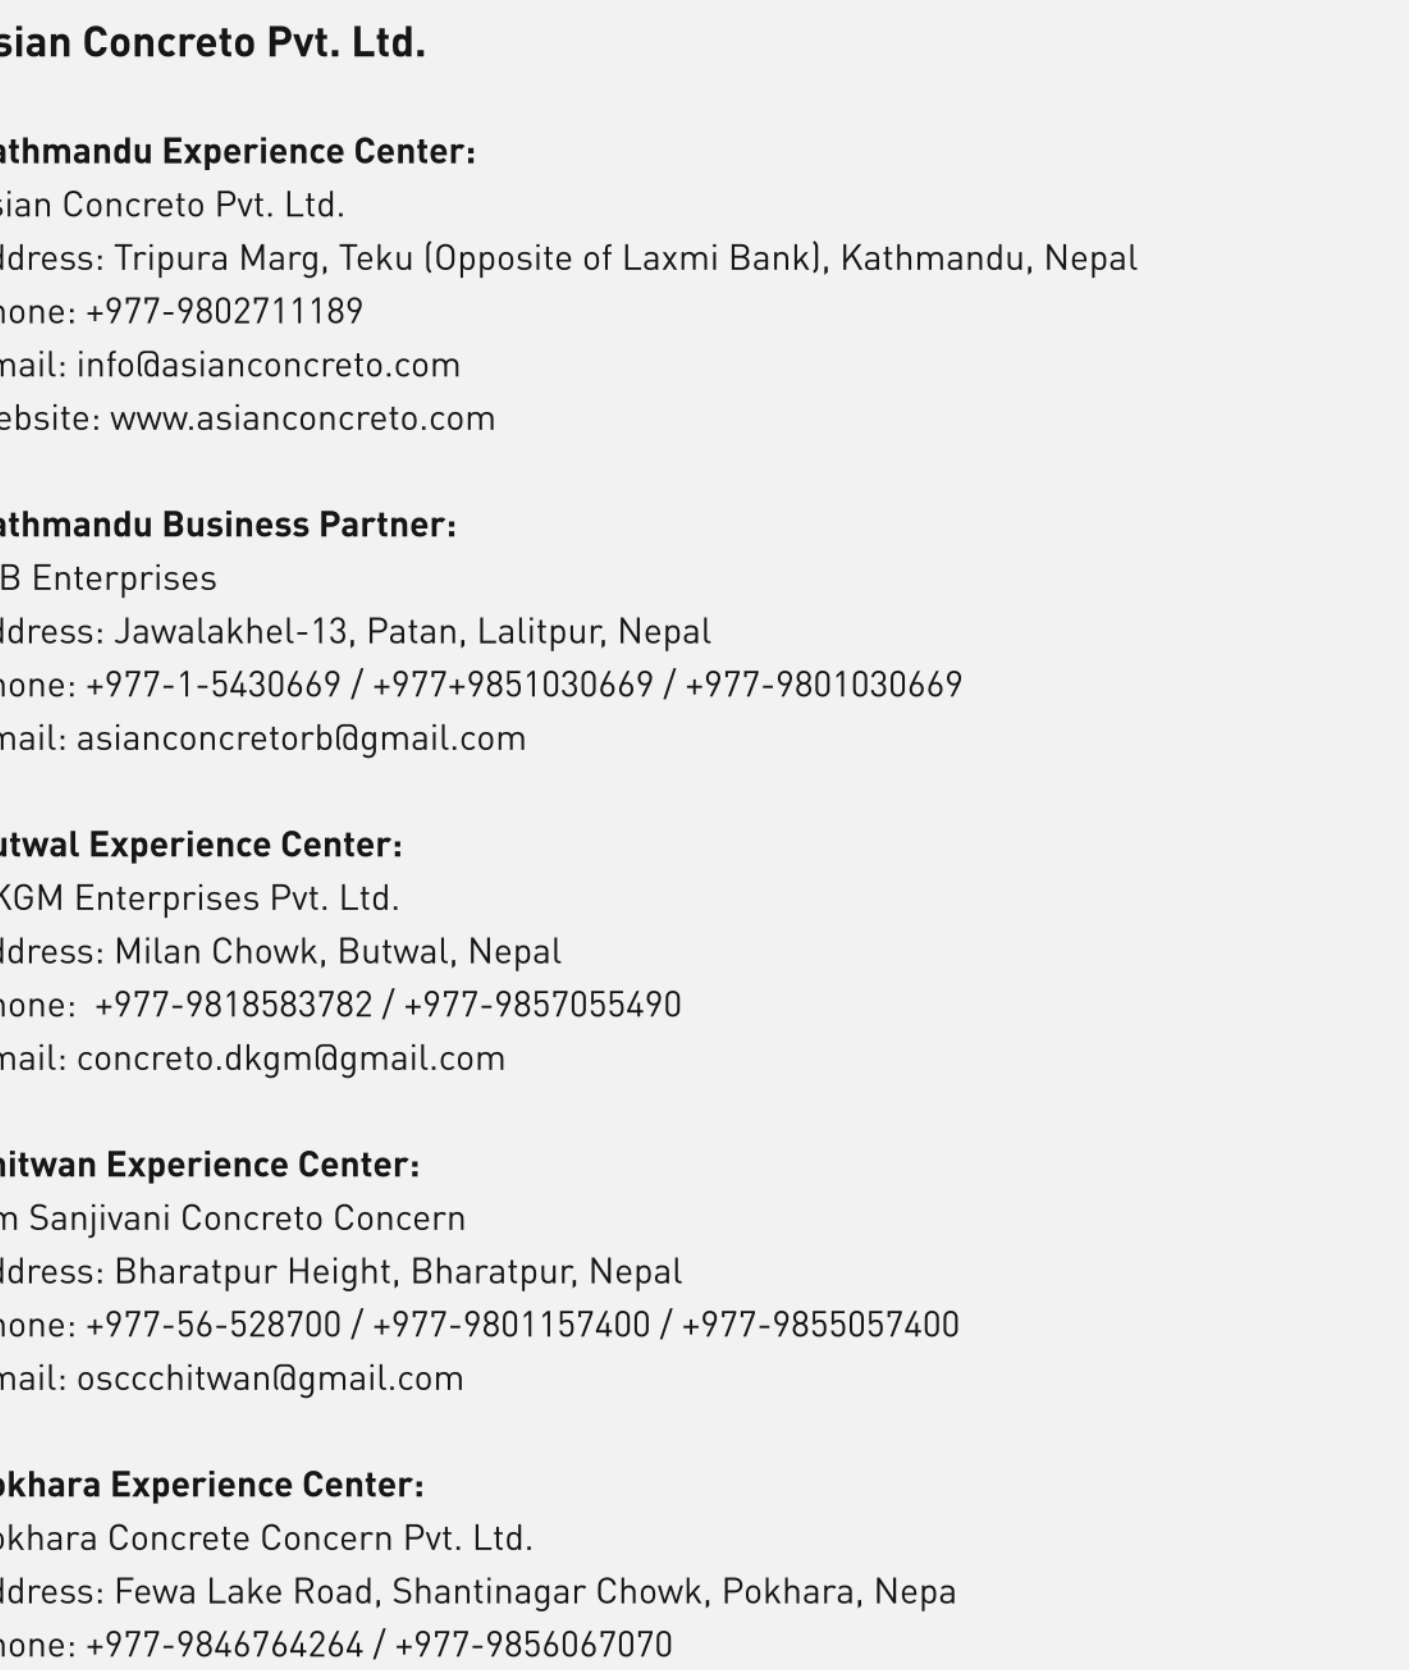

“Sajin Phaiju
Sr. Engineer, Putalisadak-Anamnagar Footpath Project

You guys make it so simple. Our site has turned out to be a piece of art with a variety of product combinations. Kudos to your product. All I have to do is get the sizes and choose the design, rest assured of the quality. Unlike other product used in my past project the damage rate of Asian Product is equal to zero and the grooves on the pavers has helped to put the pavers intact throughout the applying process.

“Amar Shrestha
Proprietor of RA Builder

Putalisadak - Anamnagar Road footpath is one of the main disabled-friendly road infrastructure projects conducted by the Department of Road. In today's world, disability needs to be placed as an issue alongside others on the development agenda. All the development projects should be made accessible and disability-friendly. In one of our ongoing projects, we came across Asian Concreto's products. As expected, it suffices all the specifications of the job. The products of Asian Concreto have set the standard high for its competitors in the market.
